

VECTAPURE II™

Residential Reverse Osmosis Drinking Water Systems featuring Sani-Purge™

VECTAPURE II™ RO systems, each with a Waterite **BLACK MAX**® 75 GPD high-output membrane, are available in three sizes: RO4042H (4 stage with Sani-Purge), RO4052H (5 stage with Sani-Purge) and RO415H (5 stage with Sani-Purge and booster pump). Each system comes complete with tube-attached chrome faucet (for easy undersink installation) and all of the necessary installation tube and hardware.

RO4042H

- 4 stage RO and filtration system
- Sani-Purge sanitizing system
- Heavy-duty powder coat mount
- 75 GPD TFC membrane
- Combo carbon/sediment pre-filtration
- Carbon post-filter housing
- Push-on fittings throughout
- All installation hardware and tubing
- Lo-lead tube-attached 3/8" faucet
- 4-gallon RO holding tank
- Housing wrench
- Automatic shutoff valve
- Dual o-ring filter housings
- One-year comprehensive warranty

RO4052H

- 5 stage RO and filtration system
- Sani-Purge sanitizing system
- Heavy-duty powder coat mount
- 75 GPD TFC membrane
- Combo carbon/sediment pre-filtration
- Carbon post-filter housing
- Push-on fittings throughout
- All installation hardware and tubing
- Lo-lead tube-attached 3/8" faucet
- 4-gallon RO holding tank
- Housing wrench
- Automatic shutoff valve
- Dual o-ring filter housings
- One-year comprehensive warranty

RO4152H

- 5 stage RO and filtration system
- Sani-Purge sanitizing system
- Heavy-duty powder coat mount
- 75 GPD TFC membrane
- Combo carbon/sediment pre-filtration
- Carbon post-filter housing
- Push-on fittings throughout
- All installation hardware and tubing
- Lo-lead tube-attached 3/8" faucet
- 4-gallon RO holding tank
- Housing wrench
- Automatic shutoff valve
- Dual o-ring filter housings
- 24V booster pump with transformer
- Low/high pressure switches
- One-year comprehensive warranty

Waterite

brings pure water to life

Waterite dealers stock a full range of RO system parts, accessories and optional equipment...

contact Waterite or your dealer for full details.

- Excelpure filter cartridges
- Excelflow RO tanks and DMfit push-on fittings
- Excelflow filter housings and booster pumps
- Excelight UV disinfection lamp

Sani-Purge™ represents another RO design innovation from Waterite. This unique feature allows users to periodically flush (at the time filter cartridges are changed) all parts of the RO system and holding tank with chlorinated water to sanitize the system components *downstream* from the activated carbon filters and past the membrane; system components that are normally never exposed to chlorine in other RO systems. Sani-Purge will help keep holding tanks, faucets and tubing fresh and your drinking water pure.

All Waterite Vectapure II RO systems include Waterite **BLACK MAX** membrane elements as standard equipment. These quality elements ensure long life and high rejection rates even in the most challenging conditions.

Waterite offers a wide variety of faucet types and finishes to compliment any kitchen or bar installation. See your dealer or www.waterite.com for more information and availability.

Many Vectapure II RO systems come with Waterite's unique combination cartridge that combines sediment filtration with activated coconut carbon filtration in one step. Assures superior pre-filtration and long membrane life.

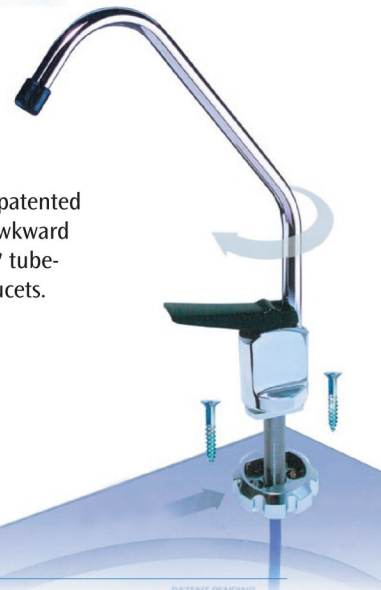

Sani-Purge dial allows users to flush and sanitize the entire RO system with chlorinated water.

Waterite introduces its all-new Quick Faucet, a patented countertop faucet adapter that eliminates all awkward undersink connections. Available in 1/4" or 3/8" tube-attached standard brass or no-lead stainless faucets. Makes faucet installations a breeze!
